

Super Fast Hay Drydown *with* **Super Feedability...**

The New 2005 Super Conditioner

features redesigned rubber rolls with raised, spiral lobes. These newly patented rolls fully intermesh to create a powerful vortex effect that aggressively feeds crops through the rolls without plugging or wrapping. The same vortex effect quickly ejects debris before causing serious damage. The rolls are precision machined, fully synchronized, and pressured by air bags to crush crops along the full length of the stem without ripping or removing leaves. This speeds dry-down, reduces the chance of rain damage, and increases your profitability.

Heavy Duty Precision Ground Steel Shafts, Bearings & Cores built to take seasons of hard work!

User Adjustable Air Pressure for perfect conditioning of everything from 1st cutting alfalfa to the toughest grasses!

Intermeshing Rolls aggressively feed crops without plugging or wrapping...even in the toughest conditions!

Kit Price:
Everything needed to outfit your existing swather.

\$8995 USD/Kit

Recovery Price:
Recover a used set of Super Conditioner rolls with the new pattern.

\$2995 USD/Set
